

Virginia Substance Use Disorder (SUD) Treatment Providers Survey

American Society of Addiction Medicine (ASAM) Training

Assessing ASAM training needs for Virginia SUD Treatment Providers

This communication is being sent on behalf of the Virginia Department of Medical Assistance Services (DMAS)

The Department of Medical Assistance Services (DMAS) and the Department of Behavioral Health and Developmental Services (DBHDS) are issuing this survey to Virginia SUD Treatment providers who are currently providing Addiction and Recovery Treatment Services (ARTS) and licensed through DBHDS, to better understand the need for additional ASAM trainings.

DMAS and DBHDS require that staff are trained and knowledgeable in the ASAM Criteria to appropriately apply patient admission criteria, continuing care, and transfer/discharge for individuals with addictive, substance-related, and co-occurring conditions. Providers will need to demonstrate compliance with the DBHDS ASAM regulations to be successful in the transition of the DBHDS ASAM conditional license to the issuance of an annual license.

If you haven't already done so, please complete the following survey based on your clinic's/agency's staff needs for ASAM training: https://www.surveymonkey.com/r/ASAM_Training

**** Please note, the survey will now close end of day, May 31st****
