

Provider Notice

In reference to the provider notice sent on February 23, 2017, “If there is a lapse in Therapeutic Day Treatment (TD) services that is greater than 31 consecutive calendar days, the provider shall discharge the member. If the member continues to need services, then a new SSPI (Service-Specific Provider Intake) shall be completed and a new service authorization shall be required.” This lapse includes summer break, if the member is not participating in a summer program.

Magellan understands that this will cause an increase in discharges submitted by providers due to the summer break. In preparation for that, we are allowing providers to submit batch discharges if they need to discharge more than three members at one time.

Magellan asks that providers submit a document or spreadsheet titled TDT Summer Discharges, with the provider agency name, contact information, TIN and MIS number. Please include the following member specific information:

1. Member’s name
2. Medicaid ID
3. Date of birth
4. Date of discharge
5. Discharge reason

Please fax the list to: 1-888-656-2168. Attention: clinical support team

*Please be advised that Magellan can enter provider discharges within two calendar days prior to the discharge date, but no earlier.
