

Provider Notice

Magellan of Virginia works to ensure all members receive the needed services and supports to assist them on their recovery journey. Communication and coordination between a member's medical and mental health provider promotes improved treatment and care while increasing the member's satisfaction with the treatment experience.

Please take a few minutes to complete a brief (eight-question) survey related to care coordination. This survey will continue to provide valuable information on how Magellan can support providers in their efforts to collaborate with other health care providers.

Please access the survey at the below link. The survey will close at the end of business on Thursday July 20, 2017.

<https://www.surveymonkey.com/r/DNVCPR3>

Thank you for your participation.

Please review the links below for previous communications and training materials related to care coordination. The information is available on Magellan's website www.magellanofvirginia.com.
