

Provider Notice

In an effort to increase the efficiency for processing authorizations for care, Magellan of Virginia is enhancing the provider web portal (www.MagellanProvider.com). The changes will take effect over the next few months.

The web portal enhancements will assist providers to include necessary attachments, to ensure member eligibility for the requested service under their current Medicaid plan and to ensure the requested service does not conflict with any current service(s) the member receives.

If you experience any issues with the web portal, please contact Magellan of Virginia at 1-800-424-4046 for assistance or utilize the [contact us](#) tool on the Magellan of Virginia [website](#).
