

# Residential Services for Substance Use and Behavioral Health

## Residential: Addiction and Recovery Treatment Services (ARTs)

ARTS residential services for adolescents include: American Society of Addiction Medicine (ASAM) Levels 3.1, 3.5, 3.7, and 4.0. The ASAM levels of residential services vary in intensity from low, medium, to high.

If the adolescent's primary diagnosis is a substance use disorder please submit an ARTS residential service request to the Health Plan or Behavioral Health Service Administrator (Magellan).

For assistance or a list of ARTS residential providers, contact the adolescent's Health Plan or the Behavioral Health Services Administrator (Magellan). Providers can also be contacted directly for services.

## Residential services for behavioral health

Behavioral health residential services include: Therapeutic Group Home (TGH) and Psychiatric Residential Treatment Facility (PRTF)

Each child seeking admission to behavioral health residential services (TGH or PRTF) will first receive the support of the local Independent Assessment, Certification and Coordination Team (IACCT) to assess the child's needs.

If the youth's primary diagnosis is a mental health diagnosis, please submit a Residential Inquiry form to Magellan to begin the process. This form can be found on the Magellan of Virginia website in the Residential Program Process section.

For additional information on the IACCT process, please refer to IACCT overview guides on the Magellan of Virginia website in the Residential Program Process section.

## INTERACTION BETWEEN ARTS AND IACCT

If the youth is in a PRTF or TGH and it is determined that ARTS Residential services are needed, please notify the Magellan Residential Care Manager (RCM) who will assist with identifying appropriate ARTS resources for the youth.

If the youth is in an ARTS Residential facility and needs to transition to a PRTF or a TGH, please submit an IACCT Inquiry form as soon as the need is identified.
