

Provider Notice

This communication addresses the concern of GAP SMI screening entities in regard to the redundancy of information required on the Magellan web form for GAP SMI screening and the DMAS P-603 form.

Effective immediately, the Magellan web form for GAP SMI screenings is an acceptable substitute for the DMAS P-603. The Magellan form may be printed from the website, signed by the appropriately credentialed screener, dated and kept in the member's record.

Additionally, Magellan is in the process of revising the online form to include language that states it is an acceptable substitute for the DMAS P-603. January 29, 2015 is the anticipated date for this notice to be added to the web form for GAP SMI screening.
