

Provider Notice

Effective January 30, 2015, members are allowed to receive case management services provided by their local Community Services Board as an independent service. To register case management services with Magellan, CSBs should follow the process of submitting a registration. Magellan is currently working to configure the claims system to allow CSBs to submit case management claims for members who are currently receiving Intensive In-Home Services and Intensive Community Treatment.

This configuration will take place over the next six weeks. Once the claims configuration has been completed, Magellan will send a notification to all CSBs to advise case management claims can be submitted for reimbursement.
