MAKE IT HAPPEN...
Kick-start!

Behavioral Health Stakeholders:

To kick-start the enhancement of behavioral health services in Virginia, representatives of the Commonwealth's child-serving agencies and their local partners (Children's Services Act, Education, Social Services, Juvenile Justice, Behavioral Health and Developmental Services, Medical Assistance Services (Medicaid)) are planning a series of **FREE** Regional Evidence-Based Practices (EBP) Learning Collaboratives facilitated by the National Implementation Research Network.

Localities, or if more practical and appropriate, regional teams of representatives from the child-serving systems (think about for example, the agencies on your CSA teams or who might be a local "agent of change") are invited to come together for a day of learning, self-reflection, team building, and planning to enhance your local/regional readiness for the adoption, implementation and long-term sustainability of the new and excited approaches.

Local or regional teams should identify their team members and submit [the application](#) no later than February 14, 2020. Local/regional teams will receive confirmation of attendance on or before March 13, 2020. Please see the [announcement flyer](#) for more information.

If you have questions about this opportunity, please contact ebp.training@csa.virginia.gov. Looking forward to seeing you there!
